General Excellence Criteria

1. Local community news & local features - (20%)

Judges will score based on the belief that a good newspaper should provide news content that is relevant to the community and gives a clear reflection of the nature and the people of the area it serves. Quality of writing, insight and reporter initiative will be rewarded. Photos will be judged for how they contribute to the telling of the story - whether as a stand alone, spread or related to an article. Judges will be looking for local features which go beyond the news, providing a more in-depth, interesting look at the issues and people of the community through written word, and/or photographic and/or graphic elements.

2. Editorial page / op-ed - (15%)

The editorial page and/or op-ed page will be judged as one element, looking for staff-written editorials, cartoons or editorial photo which make a statement, letters to the Editor, editorial style columns and/or guest opinions. Focus will be on content but all elements of good layout and design will be considered.

3. Local advertising content - (15%)

Recognizing that advertising is an indication of how well the newspaper and the community work together for the readers, judges will look for innovative ideas, initiative to reach both traditional advertisers and new markets, and use of in-house promotions to support staff.

4. Front page - (15%)

First impressions are lasting. Judges will look for strong, concise writing and community relevance of lead stories and their heads; clean, attractive design conducive to reading; the quality, content and play on page of photos, whether black and white or colour.

5. Presentation and production quality - (10%)

Judges will look for composition and layout that results in a package which is interesting, attractive and readable. Because production quality directly reflects the newspaper's commitment to excellence, judges will assess their overall impression of the newspaper, awarding points for the sharpness of reproduction and quality control throughout the production process.

6. Photography - (10%)

Photos will be judged for impact, action, technical quality, composition, cropping, sizing, positioning on the page and cutlines. Where colour photos are used they will be judged for effectiveness rather than their presence or absence.

7. Local advertising design - (10%)

Judges will be looking for ads which through their design, concepts, understanding of the client and placement benefit the advertiser, the prospective consumer (reader) and the newspaper's bottom line.

8. Sports - (5%)

Recognizing that effective sports and recreation reporting and presentation requires a different approach than news, judges will reward for community interest, quality of coverage and content, and creativity.
